<b>Chapter 13</b> - The new beginning	123

## Introduction

What a trip!

Anya and the boys have just returned from their secret mission to the 21<sup>st</sup> century.

But things aren't the same.

One little slip up during their mission has now set in motion a series of events that will change their world forever.

Unfortunately for Anya, Zilly and Lars, they have no idea that they have caused these changes. And as you can imagine they will be in for the surprise of their lives when they find this out shortly.

Even though they think that they have done all the homework they can, Primo has other ideas. He needs Anya and the boys to complete the final and most challenging set of homework they have ever attempted.

This time they must find the answers to ten challenging questions. Once they do that, they will complete the final piece in the jigsaw puzzle about money for Primo.

As usual, time is critical and they only have two days to research and record the answers. Then they must present them back to Primo so that he can share the information with the people of the world, helping them to understand money.

This new set of homework carries a great deal of responsibility for three normal kids. Little do they realise it, but their work will go down in history as making a significant impact on their world.

Anya and the boys will no doubt need your help again, so please be ready when they give you a challenge. If you choose to join in you will definitely learn a lot.

One thing Anya and the boys have already encountered in their adventures – which they will no doubt rediscover on this mission – is that money definitely makes the world go around, but it is not everything. It doesn't make you a better person nor does it make you more important than anyone else. Please never forget that.

There's much to do and a very exciting adventure awaits...
